The 5th edition provides nursing students with the foundations for developing expert clinical practice. Thoroughly revised, the new edition responds to key health priorities, providing an innovative approach to addressing indigenous health in Australia and New Zealand. Greater emphasis is also given to the issues of self-care, examination of the nurse's role within an interprofessional team and management of the deteriorating patient to reflect the changing nature of nursing practice in the contemporary healthcare environment. Additional resources on Evolve eBook on VitalSource, student and instructor resources, review questions, conceptual care map creator, student case studies, fluids and electrolytes tutorial, nursing care plans, instructor resources, test bank, powerpoint slides, image bank, now available in either hard cover or 2-volume set paperback formats. New chapters: Chapter 3: Stress and Coping. This chapter explores theoretical models of stress, the impact of stress on human functioning and strategies for coping with stress in the context of nursing practice and healthcare delivery. Chapter 5: Working with Indigenous Peoples of Australia and New Zealand. Co-authored by highly respected indigenous and non-indigenous academics from Australia and New Zealand, the chapter role models indigenous and non-indigenous health professionals working alongside each other to improve health outcomes and the practical role that nurses can play to improve the healthcare experiences of indigenous people. Chapter 6: Recognising and Responding to the Deteriorating Patient. Authored by one of Australia's leaders in emergency response education, this chapter is designed to develop capability in relation to the national safety and quality health service standards 2017, specifically standard 8: recognising and responding to acute deterioration. Chapter 7: Cardiopulmonary Resuscitation: Basic and Advanced Life Support. Based on the Australian and New Zealand Committee on Resuscitation (ANZCOR) guidelines, this chapter promotes a problem-solving approach to the management of a patient in cardiac arrest by providing the science behind the techniques and interventions used to treat a patient in cardiac arrest.
